Pump 3 card reader — 9 failures in 12 months (5 in 90 days)

ASK STORELENS

AI decides what to look at · code computes every number

What fixed this last time?

✓ Checking store health 47ms ✓ Looking up past fixes 356ms
✓ Searching the knowledge base 3ms ✓ Looking for repeat failures 3ms

⚠ Failure #9 on S34512-DISP-03 in 12 months — past fixes aren't holding

- 8 prior incidents on S34512-DISP-03: INC0037512, INC0037042, INC0036905, INC0036086, INC0029409, INC0028055, INC0016843, INC0010326.
- Fixes applied on this device: replaced keypad + secure card reader ×3, replaced card reader board ×2, remote comms reset ×2, bagged pump / awaiting parts ×1; 4 of 8 were followed by another failure within 30 days. INC0037512 INC0037042 INC0036905 INC0036086
- Fleet-wide (1823 resolved fuel_card_reader tickets): lowest 30-day recurrence is remote comms reset (4.1%); all fix types fall between 4.1% and 4.8%. INC0038896 INC0038895
- Recommendation: replace the secure card reader (permanent fix) instead of another remote reset. Known error PRB0040006 (Fix in Progress): Recurring pay-at-pump card reader failures on Gilbarco Encore dispensers. Workaround: Remote reset of dispenser comms loop; replace secure card reader if it fails twice in 30 days. Permanent fix: Vendor firmware 3.4 in pilot. INC0037512 INC0038944

Failure #9 on S34512-DISP-03 in 12 months

Fleet-wide, the 4 fix types for this issue recur at similar rates (4%–5% within 30 days), so the fix type alone does not predict a lasting repair. S34512-DISP-03 has failed 9 times in 12 months; 4 of 8 repairs on it were followed by another failure within 30 days. Recommendation: replace the secure card reader (permanent fix) instead of another remote reset. Known error PRB0040006 (Fix in Progress): Recurring pay-at-pump card reader failures on Gilbarco Encore dispensers. Workaround: Remote reset of dispenser comms loop; replace secure card reader if it fails twice in 30 days. Permanent fix: Vendor firmware 3.4 in pilot.

FIXES APPLIED ON THIS DEVICE

Fix	n	failed again ≤30d
Replaced keypad + secure card reader	3	2 / 3
Replaced card reader board	2	0 / 2
Remote comms reset	2	1 / 2
Bagged pump / awaiting parts	1	1 / 1

QUESTION
What's going on at this store?

TOOL CALLS

tool	args	ms	rows	masked
get_store_health	{"store_id":34512}	148	3	0
get_store_profile	{"store_id":34512}	28	1	9
get_incident_timeline	{"number":"INC0039143"}	559	7	0
estimate_impact	{"number":"INC0039143"}	376	1	0

VALIDATION

citations checked **6** | bullets removed **0**
ungrounded numbers **0** | RBAC redactions **0**

Read-only by design. RBAC masking happens in the data layer before the model sees anything; every answer is citation- and number-checked before it is shown.

MAJOR · Spectrum Business outage — DFW · 54 stores · 7 cash-only · **$10.3k** est. lost sales and counting INC0039143 ▸

VALUE MODEL — LOW / BASE / HIGH (ANNUAL)

Lever	Low	Base	High
A. Time to context `ops_users × lookups/day × minutes_saved / 60 × working_days × loaded $/hr`	$2.3M	**$4.5M**	$6.8M
B. Faster restoration → sales protected `lost_sales/store/yr[mock] × fleet × assisted_share[mock] × MTTR reduction × (1 − recapture)`	$1.2M	**$2.5M**	$4.9M
C. Repeat failures avoided `repeats/store/yr[mock] × fleet × prevented share × (handling + dispatch_rate × truck roll + lost sales/repeat × (1 − recapture))`	$960.0k	**$1.7M**	$2.4M
Total	$4.4M	**$8.6M**	$14.1M

Gross sales, not margin; recapture factor applied. Conservative: present the base case. LLM run cost ≈ $945/month for 25,200 answers (tokens × price, from config).
